Education

The University of British Columbia

Vancouver, BC

Master of Engineering in Electrical and Computer Engineering

2021–2024

- Research project: Multi-agent Deep Reinforcement Learning for VLSI Routing
- Relevant courses: Deep Learning, Computer Architecture, CNN Hardware Accelerator

Imperial College London

London, UK

Bachelor of Engineering in Materials Science and Engineering

2018–2021

- Graduated with First-Class Honours
- Obtained Dean's List for three consecutive years (2018-2021)

Projects

Multi-agent Deep Reinforcement Learning for VLSI Routing

May-Oct. 2023

- Demonstrated initiative by independently mastering DRL and VLSI global routing through exhaustive self-study and comprehensive literature review
- Successfully modelled and implemented the physical routing problem in Python
- Crafted an innovative multi-agent DRL model to address the routing challenge, leveraging the sophisticated capabilities of Python libraries

Embedded System Design

Jan.-Apr. 2023

- Designed key components of an embedded system including a 4-way set-associative cache controller and a DRAM controller using Verilog. The cache reduced the runtime of a benchmark by 43%
- Implemented the system on an FPGA with a provided soft microcontroller
- Developed software and firmware in C that interacted with hardware using SPI, IIC, and CAN protocol
- Utilized hardware timer interrupt and designed a snake game software that run on the embedded system

Experience

Motorola Solutions

Vancouver, BC

Design Validation Co-op

May-Dec. 2022

- Orchestrated a comprehensive range of camera tests, ensuring precision both in lab settings and office environments
- Developed Python-based software, realizing test automation and data analysis, resulting in a significant enhancement in test efficiency. Some tests achieved automation up to 90%
- Collaborated effectively within a team framework, leveraging tools like Git and Jira for optimal workflow management

University College London

London, UK

Undergraduate Research Assistant

June-Aug. 2021

- Played an integral role in the research team by meticulously taking measurements and preparing samples
- Demonstrated analytical skills by independently evaluating vast datasets and presenting insights effectively to the research group, fostering informed decision-making
